# FORWARD-LOOKING STATEMENTS

---

Factors that may cause the actual results to be materially different from the future results expressed by the forward-looking statements include, but are not limited to: the effect of D.R. Horton's controlling level of ownership on us and the holders of our securities; our ability to realize the potential benefits of the strategic relationship with D.R. Horton; the effect of our strategic relationship with D.R. Horton on our ability to maintain relationships with our customers; the cyclical nature of the homebuilding and lot development industries and changes in economic, real estate and other conditions; the impact of significant inflation, higher interest rates or deflation; supply shortages and other risks of acquiring land, construction materials and skilled labor; the effects of public health issues such as a major epidemic or pandemic on the economy and our business; the impacts of weather conditions and natural disasters; health and safety incidents relating to our operations; our ability to obtain or the availability of surety bonds to secure our performance related to construction and development activities and the pricing of bonds; the effect of information technology failures and the risk of cybersecurity incidents and the failure to satisfy privacy and data protection laws and regulations; the impact of governmental policies, laws or regulations and actions or restrictions of regulatory agencies; the effects of changes in income tax and securities law; our ability to achieve our strategic initiatives; continuing liabilities related to assets that have been sold; the cost and availability of property suitable for residential lot development; general economic, market or business conditions where our real estate activities are concentrated; our dependence on relationships with national, regional and local homebuilders; competitive conditions in our industry; obtaining reimbursements and other payments from governmental districts and other agencies and timing of such payments; our ability to succeed in new markets; the conditions of the capital markets and our ability to raise capital to fund expected growth; our ability to manage and service our debt and comply with our debt covenants, restrictions and limitations; the volatility of the market price and trading volume of our common stock; and our ability to hire and retain key personnel. Additional information about issues that could lead to material changes in performance is contained in Forestar's annual report on Form 10-K which is filed with the Securities and Exchange Commission.

In addition to providing results that are determined in accordance with GAAP, we present EBITDA and Adjusted EBITDA, which are non-GAAP financial measures. These measures are not considered measures of financial performance or liquidity under GAAP, and the items excluded therefrom are significant components in understanding and assessing our financial performance or liquidity. These measures should not be considered in isolation or as alternatives to GAAP measures such as net income, cash provided by or used in operating, investing or financing activities or other financial statement data presented in the financial statements as an indicator of our financial performance or liquidity.

Non-GAAP financial measures as reported by us may not be comparable to similarly titled metrics reported by other companies and may not be calculated in the same manner. These measures have limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP. Reconciliations of such non-GAAP measures to the most directly comparable GAAP measure and calculations of the non-GAAP measures are set forth in the appendix of this presentation.

# FORESTAR INVESTMENT HIGHLIGHTS

# MANUFACTURING APPROACH TO LAND DEVELOPMENT

Forestar has built a unique lot manufacturing model that enables it to be a dependable supplier of lots to homebuilders, while producing solid risk-adjusted returns

**Short duration**, fully-entitled lot development projects — asset turnover is fundamental to the business strategy

**Large scale** with national footprint and in-market depth — Forestar has more than 200 active projects across 64 markets and 23 states

**Returns-focused, with strict underwriting criteria** — all projects must have >15% return on average inventory<sup>(1)</sup> and return the entire phase 1 investment (including all land costs) in 36 months or less

**Predictable operating results with strong profitability** — pre-tax profit margin of 12.9% for Q1 TTM FY 2026

**Strong liquidity and access to debt and equity capital** — Forestar's capital structure is a key competitive advantage

(1) Return on average inventory is calculated as pre-tax income divided by average inventory over the life of a project

# HIGHLY STRATEGIC ALIGNMENT WITH DHI

## BENEFITS TO FOR

- Supports Forestar's national platform
- Significant built-in demand for lots
- Improved access to capital markets
- Shared Services from DHI

## BENEFITS TO DHI

- Long-term consistent supplier of finished lots across DHI's national footprint (126 markets in 36 states)
- Integral component of DHI's operational strategy
- Participate in value creation of FOR

### Alignment with the nation's largest builder provides support and stability in changing economic conditions

- Most land developers lack the scale and access to capital to be consistent suppliers of lots to DHI across its national footprint
- DHI is committed to owning no more than a 2-year supply of lots, while increasing its mix of controlled lots in inventory
- D.R. Horton has a strong appetite for finished lots that continues even during potential market downturns
  - During the worst years of the last significant housing downturn, D.R. Horton closed ~17,000 to 20,000 homes annually, the majority of which were built on finished lots purchased from 3rd parties
- Master Supply, Stockholder and Shared Services Agreements formalize the business relationship and protect FOR's interests<sup>(1)</sup>
- DHI plans to maintain a significant ownership position in FOR over the long-term<sup>(2)</sup>

### Relationship with DHI further strengthens FOR's competitive advantage

**DHI's interests are aligned with FOR shareholders to ensure the profitable expansion of FOR's platform**

<sup>(1)</sup> Stockholder's Agreement and Shared Services Agreement summaries included in Appendix

<sup>(2)</sup> D.R. Horton owns 62% of Forestar as of December 31, 2025

# MASTER SUPPLY AGREEMENT

The Master Supply Agreement formalizes the business relationship with DHI as both companies identify real estate opportunities and protects FOR's interests via the Right of First Offer process

## A Right of First Offer (ROFO) is very different than a Right of First Refusal (ROFR)

- A ROFO agreement helps establish a fair market price/terms, whereas a ROFR is advantageous to the buyer by providing a "last look"
- The ROFO provides DHI the "first look" on available lots at market terms set by Forestar
- If FOR and DHI fail to agree on terms, FOR can offer the lots to other customers at similar terms offered to DHI

1

### Lots Sourced by DHI

FOR must offer 100% of the lots sourced by DHI to DHI at current market terms

2

### Lots Sourced by FOR

FOR must offer 50% of the lots in the first phase to DHI and 50% of the lots in any subsequent phase if DHI purchases at least 25% of the lots in the previous phase at current market terms

3

### Lots Sourced by Third Parties

FOR offers the lots to the respective customer on third-party sourced development opportunities and is not contractually obligated to offer DHI the "first look"

## DHI TRACK RECORD PROVIDES ROADMAP TO FOR

DHI's 30-year public track record provides a blueprint to FOR to achieve its own growth, consolidation and market share gains

Source: Company filings, Census  
Note: Periods represent full calendar year

## Then and Now: FOR Today vs. 2018

Since D.R. Horton's investment in Forestar in late-2017, Forestar has significantly expanded its operations

## INTERMEDIATE TERM GROWTH GOALS

Forestar has a visible path to capturing 5% market share within the highly-fragmented U.S. single-family residential lot development industry\*

Annual Lot Deliveries

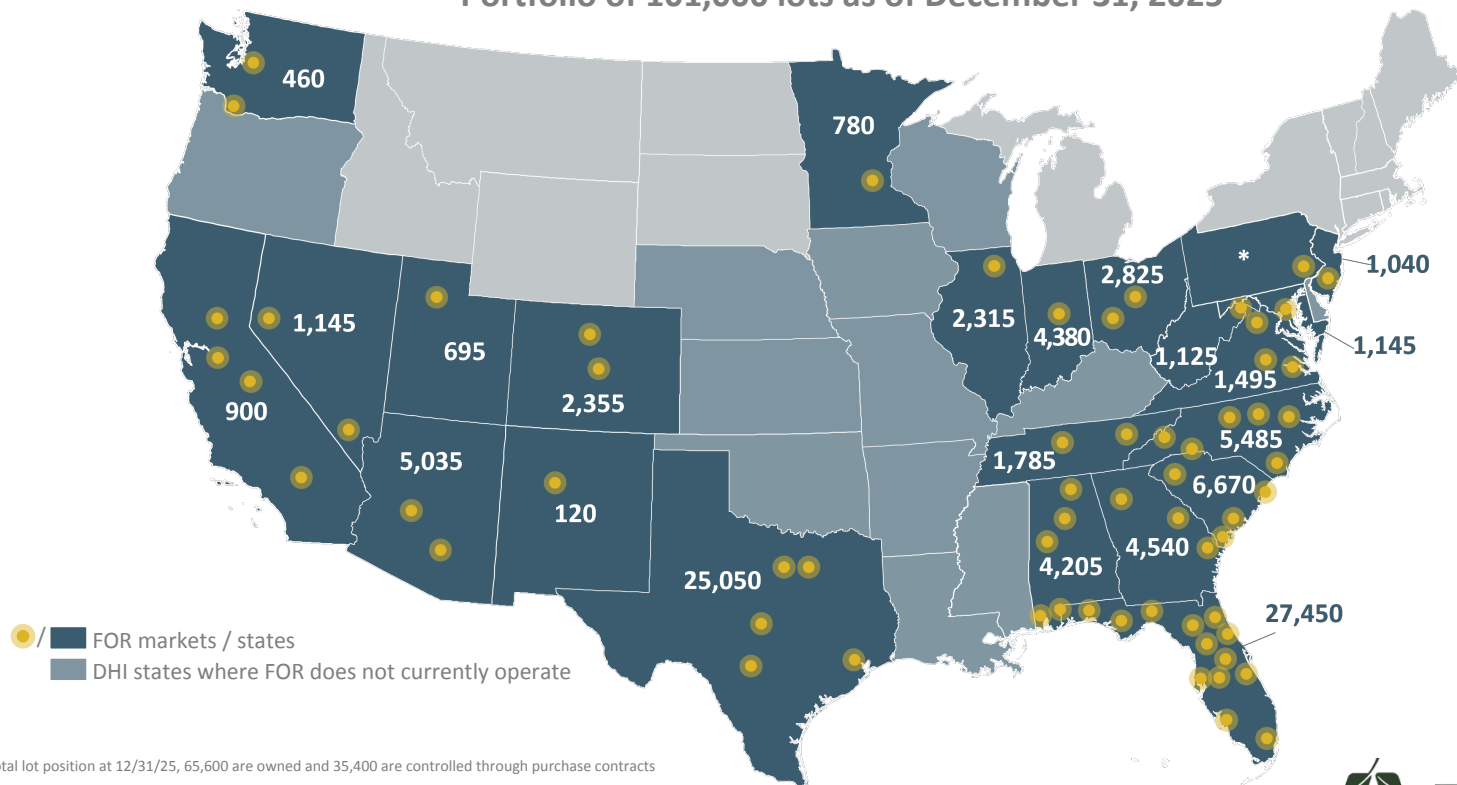

\*5% market share goal based on approximately 700,000 annual U.S. fee simple single-family homes started

# DIVERSIFIED NATIONAL FOOTPRINT

64 MARKETS | 23 STATES

Portfolio of 101,000 lots as of December 31, 2025

Of total lot position at 12/31/25, 65,600 are owned and 35,400 are controlled through purchase contracts

\*Although Forestar does not currently own lots in Pennsylvania, the Company is currently reviewing investment opportunities and expects to continue to have a presence in the state

## INTENSE FOCUS ON RISK MITIGATION

### Strategic

- ✓ Strict underwriting requiring minimum 15% return on average inventory and return of the entire phase 1 investment (including all land costs) in 36 months or less
- ✓ Diverse, national footprint lowers operational risks and mitigates the effects of local and regional economic cycles
- ✓ Strong strategic relationship with D.R. Horton, the nation's largest volume homebuilder
- ✓ Governance documents that formalize relationship with D.R. Horton and protect Forestar

### Operational

- ✓ Significant local knowledge and expertise
- ✓ Primarily focused on developing lots for homes at affordable price points (the largest segment of the new home market)
- ✓ Buy fully entitled, short duration projects with phased development, which is largely discretionary
- ✓ Experienced leadership team

### Financial

- ✓ Robust analytical process to determine best capital allocation across markets
- ✓ Demonstrated ability to manage spend and build liquidity during slower periods
- ✓ Maintain a strong balance sheet and liquidity position including managing to a  $\leq 40\%$  net debt to capital ratio
- ✓ Unsecured Company-level debt allows for operational flexibility
- ✓ Earnest money deposits on sales contracts (at least 10% of contracted revenues)

## UNIQUELY POSITIONED TO PROVIDE FINISHED LOTS

Builders' preference for 'land lighter' models enhances opportunity, and in times of economic uncertainty, many homebuilders shift their land strategies to slow raw land purchases and focus on purchasing finished lots

For LEN and KBH, data is as of the periods ended 8/31

For TOL, data is as of the periods ended 10/31

## CONSTRAINED LOT SUPPLY

- Availability of lots is improving from historic lows; however, calendar 3Q 2025 data still reflects a significantly undersupplied market nationally
- New home construction has been constrained by the availability of lots, increased regulation and tight credit for land development

Zonda New Home Lot Supply Index

Note: The lot supply index values represent single-family vacant developed lot supply, lots that are ready to be built on, relative to equilibrium

## PROJECT-LEVEL LAND DEVELOPMENT FINANCING SNAPSHOT

According to the NAHB's Survey on Acquisition, Development & Construction Financing, land development loan availability continues to be expensive and hard to secure

Effective Interest Rate of Financing

NAHB AD&C Financing Survey Index

Source: NAHB. The NAHB AD&C Financing Survey Index is derived from the share of respondents who rated the availability of new loans for land acquisition, land development and single-family construction. The share of respondents who selected "worse" is subtracted from the share selecting "better" for each series, and the results are then averaged.

## LAND AND DEVELOPMENT INVESTMENTS

- Investing in new projects while maintaining a disciplined and conservative approach to underwriting
- Phased development intends to deliver finished lots at a pace that matches market demand, consistent with FOR's focus on capital efficiency and returns
- Expect to invest approximately \$1.4 billion in land acquisition and development in fiscal 2026 with the majority of investment targeted for land development

As of the Fiscal Year Ended

\$ in millions

As of the Quarter Ended

## LOT POSITION

- Owned and controlled lot position supports future growth and market share gains; targeting a 3- to 4-year owned inventory of lots
- Consistent with Forestar's focus on capital efficiency, its land and lot supply that is controlled via purchase contracts remains robust
- Balance sheet and liquidity will be used to invest in opportunistic land purchases

Owned & Controlled Lot Position

Owned Lot Position by Source

## CONTRACTED REVENUES

- Contracted backlog is a strong indicator of FOR's ability to continue gaining market share in the highly fragmented lot development industry
- Owned lots under contract of 24,100 lots or 37% of FOR's owned lot position
- \$210 million dollars of hard earnest money deposits secure these contracts, which are expected to generate approximately \$2.2 billion dollars of future revenue

Total lots that DHI has under contract or the right of first offer to purchase of 40,700 at 12/31/25, 43,800 at 12/31/24, 33,700 at 12/31/23, and 35,000 at 12/31/22, respectively.

## COMMITTED LEADERSHIP WITH DECADES OF EXPERIENCE

# FORESTAR SUPPLIES THE FIRST INPUT TO BUILDING A HOME

---

## Key Components to Building a Home:

- **Finished Lot (~20-30% of ASP)**
- Concrete
- Lumber
- Roofing materials
- Siding / Brick
- Windows
- Insulation
- HVAC / Plumbing / Electrical
- Cabinets / Flooring / Paint
- Appliances

Note: ASP refers to the average sales price of a home

# STOCKHOLDER'S AGREEMENT

---

- FOR Board of Directors must include at least three independent directors (currently has five)
- As long as DHI owns at least 20% of FOR's outstanding equity:
  - DHI has the right to designate individuals to FOR's Board based on DHI's ownership percentage
  - DHI has the right to designate the Executive Chairman of FOR
- Requires an investment committee of FOR officers to approve new lot development and banking projects
- As long as DHI owns at least 35% of FOR's outstanding voting shares, FOR must obtain DHI consent in order to:
  - Issue equity
  - Incur, assume, refinance or guarantee debt that would increase FOR's gross leverage to greater than 40%
  - Select, terminate, remove or change compensation arrangements for the Executive Chairman, CEO, CFO and other key senior management
  - Make an acquisition or investment greater than \$45.8 million

# SHARED SERVICES AGREEMENT

---

- Shared Services Agreement between FOR and DHI defines the terms under which DHI may provide administrative, compliance, operational and procurement services to FOR
